PROFESSIONAL SUMMARY

Python & AI Engineer with expertise in scalable backend architecture, autonomous agentic workflows, and end-to-end LLM orchestration. Proven ability to design secure, optimized Retrieval-Augmented Generation (RAG) architectures and hardened execution environments. Adept at building robust enterprise-grade AI systems using Python, FastAPI, and highly secure Docker isolation to deliver sophisticated, highly performant autonomous solutions.

WORK EXPERIENCE

Python & AI Developer Intern | Infotact Solutions January 2026 - May 2026

- StatBot Pro (Autonomous Data Analyst):** Engineered an AI-powered analytics agent utilizing Python, FastAPI, React, and LangChain to translate natural language queries into real-time, executed Python code and dynamic matplotlib/seaborn visualizations.
- Secure Code Execution:** Architected a multi-layered "Swiss Cheese Defense" utilizing a hardened, unprivileged Docker sandbox with read-only mounts to securely execute Llama-3 (Groq) generated code, fully mitigating prompt injection vulnerabilities.
- DocuMind Enterprise (RAG AI System):** Developed a high-performance Retrieval-Augmented Generation system with sub-second latency, integrating Pinecone vector databases with robust, parallelized asynchronous document ingestion pipelines.
- Enterprise Guardrails & Architecture:** Enforced zero-hallucination guardrails via strict relevance-thresholding, implemented dynamic source citation for exact-page references, and built custom Redis-backed API rate limiting for endpoint protection.

Python & Odoo Developer (Trainee) | Cybrosys Technologies September 2025 - November 2025

- Configured and customized Odoo ERP system modules, gaining a strong foundation in core enterprise business workflows and functional software architectures.
- Engineered foundational Python scripts and logic overrides to automate complex tasks and streamline backend business process integrations.
- Enhanced frontend user interfaces utilizing HTML, CSS, and jQuery to improve system navigation and operational efficiency for end-users.

TECHNICAL SKILLS

AI & Backend:	Python, FastAPI, LangChain, RAG Architecture, LLM Orchestration, Agentic Workflows, Express, Node.js
Frontend:	React 18, JavaScript (ES6+), HTML5, CSS3, Material-UI, Vite
Infrastructure:	Docker Sandboxing, Server-Sent Events (SSE), API Rate Limiting, Prompt Injection Mitigation
Databases:	Pinecone (Vector SQL), PostgreSQL, MySQL, MongoDB
Tools & DevOps:	Git, GitHub, VS Code, Monorepo Architecture

EDUCATION

Master of Computer Applications (MCA)

July 2023 - July 2025

College of Engineering, Vadakara

CGPA: 7.9

Bachelor of Computer Applications (BCA)

July 2020 - July 2023

Don Bosco Arts & Science College

CGPA: 7.2

CERTIFICATIONS

- **Certificate of Internship (Python Development)** - Infotact Solutions
- **Certificate of Training (Python Development)** - Infotact Solutions
- **AI Tools Master Course & AI Course** - BE10X
- **CSS & HTML Master Course** - CodeKaro
